PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of freelance experience delivering backend-driven web applications using Laravel, Next.js, MySQL, and PostgreSQL. Skilled in REST API design, database architecture, and authentication/RBAC, with additional experience in React and full-stack development.

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript, Python, SQL
- **Frameworks & Libraries:** Laravel, React.js, Next.js, Tailwind CSS, Bootstrap, jQuery
- **API & Authentication:** REST API, RESTful API Design, Authentication, Role-Based Access Control (RBAC)
- **Software Architecture & Design Patterns:** MVC, Repository Pattern, Service Layer, Object-Oriented Programming (OOP)
- **Database:** MySQL, PostgreSQL, Relational Database Design, Database Migration
- **Security:** Google OAuth, Password Hashing, OWASP Top 10 Fundamentals
- **Tools & DevOps:** Git, GitHub, Vite, VPS Deployment, PHPUnit
- **Third-Party Integration:** Midtrans Payment Gateway, RajaOngkir API
- **Methodologies:** Software Development Lifecycle (SDLC), Agile Software Development

PROFESSIONAL EXPERIENCE

Solveit Indonesia — Freelance (Remote) **Jan 2024 – Present**
Full-Stack Web Developer

- Delivered 5+ production-ready web applications for business, education, certification, and organizational clients using Laravel, React, Next.js, MySQL, and PostgreSQL, translating client requirements into functioning software solutions.
- Designed relational database schemas and REST APIs, implemented authentication and role-based access control (RBAC), and integrated Midtrans and RajaOngkir to support multi-user workflows, online payments, and logistics automation.
- Deployed and maintained applications across VPS and shared hosting environments, and introduced PHPUnit unit tests covering core business logic and API endpoints to support safer code changes during ongoing development.

Community Service Program (KKN), Universitas Negeri Malang **Jan – Mar 2025**
Software Developer

- Designed and developed SIRADJU, an offline desktop application using Python, Tkinter, and MySQL to support infrastructure cost estimation for the Junrejo Village government.
- Automated project-volume calculations, AHSP data extraction from PDF documents, and export to standardized Excel budgeting templates, replacing manual calculation and data-entry steps in the estimation process.
- Implemented password-hashed authentication and independently managed requirement analysis, system design, development, testing, executable packaging, deployment, and user handover.

SELECTED PROJECTS

Hismaya Cahaya Rahayu **Mar – Apr 2026**
Backend Developer | Solveit Indonesia

- Developed the backend architecture for a bilingual certification-services platform, implementing database-driven content management with PostgreSQL, Prisma ORM, and Next.js Server Actions.
- Implemented authentication and authorization using NextAuth with email login, Indonesian phone number verification, Google OAuth, JWT sessions, and role-based access control (ADMIN/USER), including protected administrative workflows.
- Built multilingual content management, image storage with Vercel Blob, session handling, and server-side validation to deliver a production-ready platform for certification and training services.

Mentorin Education **May – Aug 2024**
Frontend Developer | Solveit Indonesia

- Developed responsive frontend interfaces for a Computer-Based Test (CBT) simulation platform providing realistic examination experiences, structured learning materials, and performance evaluation.
- Implemented interactive examination workflows, including real-time timers, question navigation, progress tracking, score recaps, and dashboard components.
- Collaborated with the backend team to integrate authentication, Midtrans payment processing, and learning modules into a cohesive user experience.

Kripiku **Feb – May 2024**
Full-Stack Developer | Academic Capstone Project

- Developed a full-featured e-commerce platform digitizing product catalog management, inventory, online purchasing, and transaction processing for a local MSME.
- Integrated Midtrans Payment Gateway and RajaOngkir API to automate online payments and real-time shipping cost calculation, implementing role-based access control and stock validation.
- Received the Bronze Award at the International Capstone Expo 2024 (Technology for Society) and was officially registered under an Indonesian copyright certificate, recognizing the platform's technical originality.

EDUCATION

Universitas Negeri Malang **Aug 2022 – Jan 2026**
Bachelor's Degree in Informatics Engineering

GPA: 3.84/4.00 | Graduated Cum Laude

CERTIFICATION & TRAINING

Cyber Security Specialist — Course-Net Indonesia **Sep – Dec 2024**
Certified Independent Study, MSIB Batch 7

Completed structured training in secure software development, OWASP Top 10 fundamentals, and authentication and access control, with hands-on final projects covering application-layer vulnerability assessment, penetration testing, and digital forensics.
